SITES & SERVICES

Our outpatient clinic sites offer a wide range of physical, occupational and speech therapy services, including a number of specialty programs.

Physical Therapy is a profession dedicated to pain relief, injury prevention and movement restoration. Our highly-educated team of health care professionals helps community members maintain mobility and quality of life. In many cases, physical therapy can help to avoid surgery. Our team prides itself on the use of evidenced-based treatment techniques. In fact, many members of our team are instructors for universities or continuing education companies. The result is a team that is highly trained in the most current methods and treatments.

We provide interventions for a variety of diagnoses and symptoms.
